Office series Dual mode version user's manual

In The Box:

Product structure :

Note: The device has no power switch. It will turn on when connected to a power source and shuts down after disconnection

Conference equipment connection :

Note: The device should be deployed in an open area, keep the perimeter away from walls or obstructions. Otherwise, local reverberation will be formed, and the other party will hear echoes during the call.

Dual mode version – First startup interface Set resolution :

• First, you must switch the TV signal source to the connected HDMI

Note: Switching signal sources requires operation on the TV remote control. Some TVs can switch signal sources by voice operation. Please refer to the TV manual for settings

Dual mode version:

Note: Screen projection and HDMI cannot be turned on at the same time

Dual mode version – Start a zoom meeting:

2 start a meeting

Note: Use the mouse buttons to operate, left button to enter and right button to exit.

Dual mode version – Start a skype meeting:

• Enter the skype

The shared screen using TeamFree capabilities seen by participants in the mobile-side zoom conference

Shared screen content on participant PCs

The shared screen using TeamFree capabilities seen by participants in the PC-side zoom conference

Dual mode version – How to use TeamFree meetings:

main menu

Dual mode version – TeamFree meeting:

Tips: To delete a friend, long press the friend icon(5s) or long press the touch panel (5s) in WeChat and release.

Note: Screen projection and HDMI cannot be turned on at the same time

2 remove friends

- Select the user icon and press and hold with the left button (5s)

-The WeChat applet/APP selects the user, long press the touch area (5s) and release

Function 1: Two-party conference

• Select a friend, click to make a call /slide the touchpad of the control to select a friend, and double-click the touchpad to make a call.

The video stream can be turned on as needed when making a call. When the network is smooth, use camera + HDMI, or camera + micracast, when the network is poor, the camera can be turned off and use voice communication .

Note: Screen projection and HDMI cannot be turned on at the same time. After the Miracast is turned on, mobile phone (Android or Apple) can directly use the screen mirroring function.

Function 2: Three-party conference

① Three-way conference can call the common friends base on two-party call.

Tips: Click the small window in the dual video window to switch the size of the window. Double-click the large window to full screen the window. In a full-screen window, you can switch the video on the opposite end in the upper right corner. **Note: Screen projection and HDMI cannot be turned on at the same time**

Preparation to use –APP remote control:

TeamFree's App remote control device

(TF Android app can be downloaded from the Google app store and TF Apple app can be downloaded from the Apple app store)

- 1) TF's App need to add box friends.

👤 wl1207

- 2) APP request management to box, the box agrees with the app management request

囵

6 The box side agrees with app management

After the box agrees with the app management, the app friend on the box will display the manager icon. When the manager is controlling the box, the icon color will change the color 。

App friend operation interface

App remote control interface

Note: The first management request of the app, the box will pop up the consent dialog box, and after first managment request will no longer pop up the consent dialog)

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

- —Increase the separation between the equipment and receiver.
- -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- -Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons.

Caution:

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
